

AGRI-vator

- This unit will aerate pastures, hay fields, or accomplish renovation for sod farms.
- Using a patented vibrating action, the AGRI-vator loosens and breaks up the soil without destroying existing turf on the surface.
- Crushing action between the rotors breaks up the soil in the root zone, significantly improving infiltration of air, nutrients and water.
- Minimizes lake and stream runoff.
- Design allows operator to vary the tine aggressiveness by changing the PTO RPM and groundspeed.
- Solid vibrating tines.
- Solid vibrating tines create holes up to 6 inches deep.
- Conditions equestrian courses and race tracks.
- Optional seeder and roller available.

Widths: 6, 8 and 12 feet widths
